

Dovea GENETICS

Your widest choice for
BEEF SIRE

BEEF SIRE DIRECTORY

2012

Introduction

Welcome to the Beef Sire Directory for 2012 from all in Dovea Genetics. We are delighted to present you with the most comprehensive range of breeds and bulls within each breed. We have bulls within our range to suit your farming system.

The Dovea Genetics beef programme has developed significantly within the past twelve months with many of the younger bulls achieving significant success in the show and more importantly in the commercial and pedigree sales ring. The high ranking of many of the Dovea Genetics beef bulls in the ICBF Active Bull List shows that many of the top beef bulls are in the Dovea stud. The financial benefit of using these bulls should not be forgotten. We have added to our selection of beef bulls since our 2011 Sire Guide with the purchase of many new bulls. It is important that these new bulls are used correctly within your herd. To gain maximum benefit from these new bulls I would suggest that you discuss your breeding requirements prior to commencement of the breeding season with one of our experienced breeding advisors or A.I. Technicians so the correct bull is used.

The demand for cattle in the livestock marts or beef in the factories is at an all time high in early 2012. The medium to long term indications for the beef industry are very encouraging. It is vital in these buoyant times that we continue to focus on the production of quality cattle. The use of A.I for terminal or maternal purposes is vital to increase financial returns to beef farmers. The team in Dovea is more than happy to help you in any breeding matters or decisions.

Specials

As you browse through the beef sire directory you will see bulls in some breeds under the heading 'SPECIALS'. These are bulls from within Ireland and from abroad, from whom Dovea has secured the semen rights to. As the semen has an extra charge, we put the relevant bulls under the heading of 'SPECIALS'.

Semen Storage

It is important to note that pre-ordered semen stored in Dovea Genetics AI Technicians tanks is at the farmers own risk. Please feel free to contact our distribution personnel in Dovea if you have any queries re same.

May I wish you every success with your breeding in 2012.

Dr. Ger Ryan
